Email: jessydavies@hotmail.com

A dedicated individual looking to put my skillset, consisting of strong problem-solving skills, to good use by acquiring hands-on & remote work experience in the field of website design and development.

Experience

- Volunteering as a Young Carer (2019-2021)

As a carer for my brother with autism, I've developed many skills working as part of the young carers team, such as teamwork and communication, as well as being praised for how well I am taking care of him and understanding him needs.

- Paid Part-Time Carer (August 2024 - Present)

During my time as a carer for my grandmother, I've developed a range of skills for the workplace, such as responsibility and punctuality. I would be praised for my work by my grandmother, which motivated me to continue working for her.

Education

- Cardiff University | BSc (Hons. Computer Science) | Second-Class Honours (2021-2024)

Skills

- HTML | CSS | VanillaJS | PHP | Python | NodeJS

My strongest languages I can work with.

- Experienced in UX and UI design

There are numerous website designs I've created on my portfolio website. I've also used software such as Figma and Axure during my time at Cardiff University.

- Working as a Team and Individually

While at Cardiff University, I had the opportunity to work on numerous projects, which gave me insight into work skills and responsibilities. There were many times where I took the role of leader to ensure everyone was contributing, ensuring that the project would be complete.

Projects

- DOMKit | Created February 2025

An open-source, vanillaJS library that simplifies the creation and styling of HTML components, with the goal of using less CSS and ensuring simplicity when it comes to more complex styling tasks, such as animations.

- Portfolio Website | Created Early 2024

A website where I showcase my web design/development works, as well as some creative works, such as artwork.
